Glen Parva and Glen Hills Nature Reserve

What we Volunteers do?

Trees

Planting new trees such as this fine Jubilee oak and the Spindle tree that we grew from seed

General maintenance such as coppicing, removing lower branches and removing unwanted saplings

Plants

Planting bulbs, corms and sowing seeds

Clearing areas around plants such as this Snakes Head Fritillary and separating plants such as this clump of Snowdrops

Pathways

Making a new pathways with the help of The Conservation Volunteers – before and after

Clearing main pathways of leaves and overhanging plants

Bird/Bat boxes

Installing and maintain bird and bat boxes with the aid of our Wildlife Officer

Species recording

Ringlet - *Aphantopus hyperantus* **Scorpion Fly - *Panorpa communis*** **Crocus - *Crocus vernus***

Silver Lichen – *Physcia tenella* **Jews Ear - *Auricularia auricula-judae*** **Wren - *Troglodytes troglodytes***

For those that are interested we are trying to collate a full species record of the reserve – might take a time
